Retirement Income Strategies

After a lifetime of saving, making the transition to retirement means facing a whole new set of challenges.

Simple Tips to Make Tax Time Less Taxing

Basic Etiquette Tips for Golfers

Life Insurance Mistakes You Don’t Want to Make
Dear Client,

I hope this newsletter finds you well and that you enjoyed a joyful Winter filled with friends and family. We at Fross & Fross Wealth Management had an exciting Winter and are looking forward to a bright Spring.

With the volatility and negative sentiment that has been affecting markets this year, we’re continuing to carefully monitor our clients’ portfolios and making considered changes where we feel necessary. Though we can never predict where markets will go or when optimism will return, we are always looking for opportunities amid the uncertainty.

We know that it’s a challenge to stay calm when markets swing, today’s investors need to be able to keep emotions in check and focus on long-term goals. As your financial professionals, one of our main jobs is to act as a buffer against the noise and help you make sense of the fundamentals. We will proactively reach out to you if our analysis suggests prudent changes to your strategies are needed. However, if you have any questions about how market movements may affect your strategies, please give us a call; we would be happy to speak with you.

We’re excited to present this issue of the Perspectives Newsletter. This season, we discuss the essentials of retirement income preparation and avoiding costly mistakes with life insurance. We also share some tips for etiquette on the golf course.

We sincerely hope that you find this Perspectives Newsletter interesting and informative. We’re always looking for ways to educate our clients and give them greater insight into the issues affecting investors today. If you have any questions about what we’ve covered, please let us know. If you have any family or friends who would enjoy receiving their own copy of the newsletter, please give us their information and we will be happy to add them to our growing list of subscribers.

As always, it is an honor and a privilege to serve you. On behalf of all of us at Fross & Fross Wealth Management, thank you and best wishes for a wonderful Spring 2016.

Warm Regards,

Robert Fross

Registered Executive Assistant to Robert C. Fross

Allison joined the Fross & Fross team in 2015. Throughout her over 20 years of experience in the financial industry, she has mastered countless skills that both enrich our team and broaden our client services. As a member of our team, Allison assists Rob Fross with servicing his clients at the highest possible level.

Allison currently holds her Health and Insurance licenses. She also holds her Series 7 and Series 66. She is originally from Hollywood, Florida and moved to Dunnellon, Florida in 1997. She and her husband, David, have been married for 17 years and have two beautiful children, Alexis and David. In her free time, Allison is usually attending sporting events with her children.
Recent changes to Social Security claiming rules, rising health-care costs, and turbulent markets make maintaining a comfortable retirement lifestyle more challenging than ever. This article answers some common questions about retirement income preparation and presents you with ideas to guide your own thinking.

WHAT IS A RETIREMENT-INCOME STRATEGY?
A retirement income strategy is designed to allow you to pursue your retirement goals while helping to ensure that your money lasts as long as you do. An ideal income strategy will cover your basic expenses through guaranteed income, hedge against longevity and rising costs by pursuing growth, and give you enough flexibility to adapt to changing circumstances. For most retirees, Social Security benefits and withdrawals from personal savings will account for a significant percentage of their retirement income. To create a personal retirement-income strategy, start by answering two questions:

How Much Income Will I Need to Live Comfortably in Retirement?
To begin to answer that question, you must have an idea of your retirement goals and their associated financial costs. One way to organize your thoughts about income is to think of them as a hierarchy of needs, wants, and dreams.

Classifying your retirement expenses in these terms can help you understand how much income you will need for essential expenses and how much you will want for discretionary expenses that can be reduced in a pinch. If you can cover most of your basic needs through guaranteed sources of income, you have a lot more flexibility to adapt your retirement portfolio to changing market environments.

It also may be useful to use a top-down approach to estimate how much of your current income you will need to replace in retirement. Though many people worry that they will need to replace their entire pre-retirement paycheck when they retire, that’s usually not true. Research by Fidelity found that most high-earning Americans only need to replace between 55 percent and 72 percent of their pre-retirement income. Since that estimate is averaged across different income levels and lifestyle goals, it may not be valid for your personal situation. That’s one of the many reasons why it’s a good idea to work with a professional who can create a customized analysis of your retirement.

Where Will I Get My Income Retirement?
Most retirees depend on a mix of reliable income from sources like Social Security or pensions and withdrawals from their retirement savings. Others supplement those sources with

**RETIRED INCOME STRATEGIES**

After a lifetime of saving, making the transition to retirement means facing a whole new set of challenges. Today’s retirees face a retirement landscape that is very different from the one their parents saw. Americans are living longer and enjoying active lifestyles, and may need to rely on their retirement strategies for longer.

---

“HIGH-EARNING AMERICANS ONLY NEED TO REPLACE BETWEEN 55 PERCENT AND 72 PERCENT OF THEIR PRE-RETIREMENT INCOME TO MAINTAIN THEIR LIFESTYLE ONCE THEY RETIRE!”

---

**How much of your current income will need to be replaced in retirement?**

**Personal dreams**
A bucket list of the projects, goals, gifts, and aspirations that you dream of taking on if you have the time and resources.

**Lifestyle wants**
Discretionary expenses that are important to your retirement lifestyle like travel, family vacations, hobbies, education, entertainment, etc.

**Basic needs**
Essential expenses like housing, food, healthcare, transportation, taxes, etc.
income from rental properties, businesses, or encore careers. There is no one-size-fits-all solution; a diversified income strategy should combine enough guaranteed income to cover essential expenses, with potential growth to fight inflation, and be flexible enough to keep up with changing priorities and market conditions.* Identifying your known sources of retirement income will help you estimate how much you will need to generate from your investments each year. One study found that workers who earn between $50,000 and $300,000 per year should count on generating about 45 percent of their retirement income from their retirement portfolio.* Again, this is an estimate that may not hold true for your personal situation, but it may be useful as a starting point for analysis. Another factor to consider is how much income can be generated by your portfolio without running out during your lifetime. While you may have heard about the “4 percent” rule of thumb for annual retirement withdrawals, research suggests that most retirees cannot rely on a simple yardstick for something so complex.* It’s very difficult to know in advance what you can safely withdraw from your portfolio each year, since it depends on many interdependent variables, like market performance, expected life span, inflation, and more. As professionals we use sophisticated software and test many assumptions to help our clients prepare for a variety of scenarios. One major risk that today’s retirees have to contend with is the effect of volatility and market corrections on their portfolio returns. If you are forced to withdraw too much from your investments during periods of poor performance, you risk emptying your portfolio too fast. By building flexibility into your strategy and carefully managing risk, you can help reduce the effects of these negative periods on your retirement.

HOW CAN I MAXIMIZE SOCIAL SECURITY BENEFITS UNDER THE NEW RULES? One of the most important decisions you and, if you are married, your spouse will have to make is when to start claiming Social Security benefits. Since Social Security benefits are guaranteed for life and will increase over time with inflation, they form the foundation of most retirement-income strategies. Married couples have more claiming options to consider, and the right claiming strategy can help increase joint income and leave a larger survivor’s benefit to a spouse, though it might mean giving up some income early in retirement or working longer. The rules of Social Security allow a worker or spouse to begin claiming benefits as early as age sixty-two, but beneficiaries accrue delayed retirement credits for every month they delay claiming until age seventy. By waiting, you can collect up to 8 percent more each year.* Married couples also have the option of allowing one spouse to claim a spousal benefit on the other person’s work record if the benefit is larger than their own or they do not qualify for a personal benefit. Social Security rules recently changed, and two claiming strategies (“file and suspend” and “claim now, claim more later”) are going away. Some couples who are already using these strategies or meet age requirements may still be able to take advantage of them. If you believe that you should be grandfathered in under the old Social Security rules, contact your financial professional immediately.

Though the expiration of these two advanced claiming strategies takes away some options for retirees, making the right choice about when to claim is still critical to maximizing this essential source of income. For most retirees, two main questions will drive their Social Security claiming decisions:

• How long do you and your spouse expect to live?
• Can you afford to delay claiming benefits to accrue additional credits?

In general, if at least one member of a couple expects to live until age eighty, deferring benefits to claim more money later may make sense if you can afford to do so. However, if health issues or family history make a long life span unlikely, claiming benefits earlier may be wiser. If you would like help analyzing your options, a financial professional can run the numbers on different claiming scenarios to help you make a more educated decision.

SHOULD I RETIRE EARLY OR WAIT? Some retirees are counting the days until they can pack their desks and go. Others identify closely with their work and can’t imagine life without a career. Wherever you fall on that spectrum, the choice of when to retire can have an enormous impact on your retirement strategies. Don’t forget about health insurance and medical care as well. If you currently receive health coverage through your employer, you might get sticker shock when you see what it would cost to purchase Medicare or private insurance. Delaying retirement for even a few years can substantially increase your retirement savings and improve your retirement options. However, there are other lifestyle factors to consider. If you are confident in your retirement preparations and have a strong desire to stop working and start your next phase of life, retiring later may be worth the additional risk. Part of creating a personal retirement strategy is understanding which risks you’re willing to embrace.

HOW WE CAN HELP
Saving and investing for retirement is just the first step. Developing an income strategy and maintaining it over time is a very different challenge. If you’re not certain about your retirement strategies, you’re not alone. A 2015 survey found that just 22 percent of Americans feel very confident about having enough money to live comfortably in their retirement years.*

We take an approach to retirement income that is based on an analysis of your personal financial situation and your goals for retirement. We’ll work with you to identify sources of income and develop a cash-flow strategy that takes into account the timing of future expenses and balances income with your need for growth to protect against rising costs. If you or anyone you know has questions about building a personalized retirement-income strategy, please contact our office; we’d be delighted to be of service.

Choosing the Cheapest Policy

Everyone wants to get a good deal on insurance, but picking the life insurance policy with the lowest premium might cost you (or your family) a lot more later if it’s not the right policy for your needs. A qualified insurance specialist can compare policies and help you get the right insurance without paying more than you need.

Before buying a policy, ask:

- Am I getting the right kind of insurance for my situation?
- Is the death benefit enough for my family’s needs?
- Is the insurance company sound and well regarded?
- Does it have a track record of handling claims fairly?

Failing to Review Your Life Insurance Regularly

Like everything else in your financial life, life insurance isn’t a one-and-done proposition. It’s very important to review your policy occasionally to help make sure it still meets your needs. In the worst cases, an out-of-date insurance policy can lead to problems for your family when they need help the most.

The life events that should definitely trigger an insurance review are marriage, divorce, the birth of a child, paying off...
the mortgage, and retirement. A comprehensive life insurance checkup should help you answer the following questions:

- Is my policy still in force?
- Are the beneficiaries current?
- Who owns the policy?
- Do I have the right kind and amount of insurance for my current and future needs?
- Is my policy still competitive?
- Am I paying for options I don’t need?
- Is the insurance company still financially healthy?
- If applicable, does the policy term match up with my key financial milestones?

Avoid creating trouble for your loved ones by specifically naming the beneficiaries you want to receive the death benefit and updating them regularly. Consider including backup or contingent beneficiaries in case your primary beneficiaries predecease you.

4 | Relying Only on Your Employer-Provided Life Insurance

Many workers get group-term life insurance as part of their employee benefits packages. While a term policy is an excellent perk that can help protect your family, the death benefit provided is often small and usually not enough on its own. The coverage will also typically end if you leave the company, leaving your family without that financial cushion. A private policy has the benefit of being portable and completely customized to your needs.

5 | Failing to Insure Your Spouse

Many people make the mistake of thinking that only primary earners or working spouses need to be insured. They make the mistake of thinking life insurance is all about income replacement. However, take a moment to think about the value of the labor a non working spouse provides. Does he or she:

- Serve as the primary caregiver for children or adults?
- Work as the family chauffeur?
- Do laundry and maintain the house?
- Run errands?

Though this work might not earn income, it is critical to a family’s well being. In the event of your spouse’s death, it’s likely that you would have to take time away from work or pay for these services.

Next Steps

Life insurance is a critical tool in your financial life, but mistakes can be costly. One of the benefits of working with a financial professional is that he or she can review your entire situation and make recommendations about the role life insurance should play. If you have questions about life insurance or want to review your current policies, give our office a call.

“Many people make the mistake of thinking that only primary earners or working spouses need to be insured. They make the mistake of thinking life insurance is all about income replacement.”
The following practical tips can help you get a jump on tax-filing season and help ensure you meet the filing deadline with time to spare.

**Start Early**

One of the best ways to deal with tax season is to start your preparations early. If you wait until the last minute to do your taxes, you will always feel stressed and might not have enough time to address questions that might arise. You’ll also have time to find a qualified tax preparer to help you with any complex filing issues.

Most tax forms should have arrived in January. If you haven’t received an expected form, contact the issuer and ask for an update. Sometimes forms get lost in the mail, and you don’t want to be left scrambling at filing time. While you wait, use any pay stubs, receipts, account statements, or other backup documentation to run some preliminary numbers.

**Designate a Safe Storage Space**

Even if you get most of your tax documents electronically, chances are a few paper forms will be arriving in the mail. Whether you use something as simple as a large envelope or as elaborate as a filing cabinet, having a designated space for your tax documents is important. You will also want to store those documents after filing your taxes—the IRS recommends keeping records on file for three to seven years.

**Scan Your Documents**

Having your paper-based tax documents stored safely is important, but it is a good idea to have an electronic backup as well. Scanning your documents as you go is the best way to proceed, and it takes only a couple of seconds. If you don’t have a scanner at home, consider purchasing a low-cost model. It might not be a good idea to use a workplace or public scanner because of the potential for identity theft.

At home, set aside a folder on your hard drive (or online storage account) to hold your scanned documents, and then store the physical copies in the spot you designated earlier. When it’s time to file, you will have all the information you need at your fingertips.

**File Online**

Filing online is one of the best ways to avoid mistakes and avoid mail-related tax fraud. Whether you buy tax-filing software or use the online equivalents, you can enter each tax document as it arrives and go back to the return to make changes.

If you are due a refund, you can usually receive it faster if you choose direct deposit. If you owe money, consider paying right from your bank account instead of using a credit card. This will help you avoid potential fees and interest charges.

Even the most elaborate preparation cannot make tax time fun, but these tips can make it less stressful. Bottom line: starting early, getting organized, and reaching out to a professional about complex issues can all help make tax time less taxing.

Nothing can eliminate completely the stress most taxpayers feel when dealing with the IRS. However, there are plenty of ways you can make tax time easier on yourself. The filing deadline for 2015 returns is April 18, 2016, instead of the usual April 15. Because of Patriots’ Day, residents of Maine and Massachusetts will have until April 19 to file.
Golf is a wonderful pastime, but it can be hard to learn and understand the rules of etiquette expected on the course. Golf course regulations vary, but they are invariably designed to ensure smooth, safe play and an enjoyable time by all. Here are some smart etiquette tips for golfers of all ages and abilities.

• Play as quickly as you can. Ideally, you shouldn’t take more than forty-five seconds or a minute to select your club and make your shot. Save time by thinking about the lie, strategizing your shot, and taking practice swings before it’s your turn. No one expects a new golfer to be as speedy as an old pro, but keep the pace moving, and be conscious of those coming behind you. If your group is playing slowly, offer other golfers the chance to play through.

• Keep your emotions under control. Your fellow players do not want to watch you throw a temper tantrum, or worse yet, your clubs. Keeping your temper under control even when you’re having a bad round is one of the most important rules of golf etiquette.

• Understand (and abide by) the rules of golf. Even if you’re just playing a casual round with friends, you should know the basics of how to play each hole. If you are new to the game, schedule a lesson with the club pro before hitting the links for the first time. The background you gain will help you be a better player and a better partner to those in your party.

• Be on time. Respect the commitments of the people you are playing with, and strive to arrive early to warm up before your tee time. If you are worried about traffic, leave a few minutes early to make up for any problems you might encounter along the way.

• Fix those divots. If you are a new golfer, you will probably take a few bad swings as you perfect your technique. Be considerate to your fellow players by fixing the divots and putting the grass back the way you found it.

• Dress appropriately. Golf might have gotten more casual over the years, but that doesn’t mean you should dress like a slob. Show respect to your fellow players and the course owners by wearing clean, well-fitting clothes on the course.

• Stay quiet during play. It’s fine to compliment a fellow player on a great shot or enjoy friendly conversation between holes, but don’t talk or distract someone during his or her turn. Even in a large group, avoid shouting or being boisterous enough to bother other groups of players.

• Turn off your phone. Nothing is more distracting on the course than a ringing cell phone. If you must leave your phone on while you play, at least set it to silent mode.

Following these simple rules of golf etiquette will help you get more out of the game and make the learning process more fun. By the time you are an experienced golfer, you can use your knowledge to help other newbies to the sport get off on the right foot.
