

**Too Much Paper:** We want to let you know about a service that will allow you to suppress all the annual reports, proxies and some prospectuses and have them delivered electronically. Go to [www.icsdelivery.com](http://www.icsdelivery.com) - when the web page comes up, click L for LPL Financial on the upper right hand corner, then select LPL Financial. You will then need to enter your LPL account number, email address and select a pin number. You will need to do this for each LPL account that you have. This will help reduce the amount of paper that you are actually receiving.

Paperless options for your American Funds account. Go to [www.americanfunds.com](http://www.americanfunds.com) - click Go Paperless and follow the instructions. If you log in to your account with a user name, you can now choose to have your name remembered for future logins. Simply select "User name" and then check the "Remember my user name" box the next time you log in. On subsequent visits, your user name will automatically appear (a good way to ensure you're in the right place), and all you will need to do is enter your password. Please note that in the coming weeks, the Social Security Number login option will no longer be available. You will continue to have the flexibility of using a secure, personalized user name or your account number, along with your password, to access your accounts.

If you are not already familiar with it, Account View is a tool that allows you to access up to date balances of your portfolio, check for available funds or transactional activity and obtain copies of your statements. You can also select to stop your paper statements by simply clicking on the green Paperless Statements button on the home page. This feature is just a click away and is available on the website.
