# THE LIFETIME INCOME MODEL™

## Analyze and implement a prudent retirement distribution plan.

The *Lifetime Income Model*™ is designed to analyze and implement a strategic retirement distribution plan with a goal to help increase your income and minimize risk while providing tax efficiency and preservation of assets.

### TIME

**Which assets should be used first?**

This dynamic Lifetime Income Model™ is designed to help meet current needs while allowing other assets the opportunity to grow until they are needed. By allocating your assets into a series of time-sensitive distribution phases, we can efficiently organize your income needs throughout your lifetime.

### NEED

**Is there enough money saved?**

Inflation, longevity and taxes can all impact retirement income needs. Our system can help illustrate how long your money may last so you can plan your lifestyle accordingly. With many of us spending one quarter of our lives in retirement, it takes an experienced advisor, along with a sophisticated plan, to navigate these complexities.

### TOLERANCE

**Are my assets in the appropriate places?**

A well-diversified portfolio\* by asset classes, tax strategies and income needs can help reduce the volatility of your overall portfolio. Your investments should be managed prudently and fit your financial goals. Leveraging the strategies of the Lifetime Income Model™ can help increase your potential toward financial success.
