

Sowing Seeds for Change: Capital Analysts of Jacksonville Encourages Growth in the Community

Jacksonville, Florida (February 12, 2013) – Capital Analysts of Jacksonville, Florida, Inc. is happy to announce the growth of the Frederick and Ophelia Tate Ogier Gardens located at the University of North Florida. At Capital Analysts of Jacksonville, the growth and well-being of the Jacksonville community has been and continues to be an important focus for the firm. Nowhere are these values so clearly represented as through the work of Bruce Ogier, President of Capital Analysts of Jacksonville, FL, Inc. and alumnus of the university. Ogier has been heavily involved with the university's growth and success for many years, most recently through supporting a new gardening project for the students of *UNF*. The project, named after Mr. Ogier's parents, was started as a small garden in 2009. However, since it's creation, the project has been transformed into a dynamic, life-skills teaching opportunity for students to learn much more than how to grow plants.

Partnering with the Department of Health Promotion, the program now focuses on teaching its participants about human nutrition, healthy cooking methods, interpreting food labels and methods for maintaining a vegetable garden. Mr. Ogier and the university hope to promote students personal growth, as well as encourage them in their pursuit of an educated, healthier lifestyle.

The members of Capital Analysts of Jacksonville, Florida, Inc., a well-known financial plan consulting firm and local branch of Lincoln Investment Planning, Inc., have been residents and patrons of the Jacksonville area for many years. Much like the firm's holistic approach to helping clients make informed financial decisions that are right for them, the Capital Analysts of Jacksonville team strives to take a holistic approach to supporting the area – through funding local organizations, encouraging education, and working hard to serve the community.

UNF, a [nationally ranked](#) university located on an environmentally beautiful campus, offers students who are dedicated to enriching the lives of others the opportunity to build their own futures through a well-rounded education.
